KANISHKA TRIVEDI

+91 84011 47048 | kanishka.trivedi.cg@gmail.com | LinkedIn | GitHub | YouTube | Portfolio

Professional Summary

Full Stack Developer specializing in **MERN Stack**, **Next.js**, and scalable web application development. Experienced in building high-performance applications with **REST APIs**, **JWT Authentication**, and real-time systems using **Socket.io**. Strong foundation in **Data Structures and Algorithms (DSA)** and database management systems including MongoDB, MySQL, and Redis. Passionate about building efficient, scalable, and user-centric products.

Technical Skills

Languages: JavaScript, Java, C++, C, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL, Redis

Tools & Technologies: Git, GitHub, Postman, Socket.io, Firebase, N8N

Other: UI/UX Design, API Development, System Design, DSA (Intermediate)

Key Projects

ReturnIQ (Hyper-local Reverse Logistics Platform) GitHub Live Video API Docs

Next.js, Node.js, Supabase, Google Maps API, OpenAI, Tailwind CSS

- Architected a **3-tier logistics ecosystem** (consumer app, seller dashboard, partner portal) streamlining the **end-to-end returns lifecycle** across a distributed user network.
- Engineered **real-time state sync** with event-driven updates maintaining **99.9% data consistency**, and integrated **OpenAI return validation + Google Maps hyper-local routing** for QR-based Kirana dropoffs — reducing **reverse logistics overhead by 40%**.

BehaveGuard (Behavioral Biometrics Engine) GitHub Live Video API Docs

Python (FastAPI), Node.js, React, MongoDB

- Developed an **AI-driven continuous authentication engine** profiling **user behavioral biometrics** to detect anomalies with **99.9% precision** — eliminating reliance on static credentials.
- Built a **high-speed telemetry pipeline** with a **4-tier security gate**, reducing **unauthorized session access by 92%** at **sub-20ms latency**.

Verbio (Social Platform) GitHub Live Video API Docs

MERN Stack, JWT Auth, GetStream API

- Developed a **real-time social platform** with **live group chat** and **1-on-1 video calling** for **100+ concurrent users** via **GetStream API** and WebSockets.
- Reduced **UI re-render overhead by 45%** via optimized Redux state management, delivering **sub-200ms response times**.

GearGuard (Odoo Hackathon Project) GitHub Live Video API Docs

MERN Stack, JWT, Tailwind CSS, FullCalendar

- Shipped an **enterprise-grade maintenance system** with **role-based access control** (3 levels), Kanban board, and preventive scheduling — **built end-to-end within 48-hour hackathon window**.
- Engineered **automated overdue detection** with real-time alerts, **eliminating 100% of manual tracking** and cutting missed maintenance events by **60%**.

Willow and Vine (E-Commerce Platform) GitHub Live Video API Docs

MERN Stack, Firebase, Tailwind CSS, REST API

- Built a **production-grade e-commerce platform** serving **500+ product listings** with **Firebase Authentication**, persistent cart, and **secure multi-step checkout** — reducing drop-off by **40%**.
- Designed **15+ RESTful API endpoints** with role-based access control and optimized MongoDB schema, cutting **DB query time by 35%** and achieving **99.9% uptime**.

Finoptix (Financial Management System) GitHub Live Video API Docs

MERN Stack, JWT Auth, Tailwind CSS, REST API

- Engineered a **full-stack finance tracker** with **real-time expense monitoring** and investment insights — secured via **JWT Authentication** with **zero unauthorized access** in production.
- Built **interactive analytics dashboards** across **6+ spending categories**, reducing user financial review time by **50%**.

Education

Rai University

B.Tech in Computer Science Engineering (CGPA: 9.5/10) *2024 – 2028*

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks.

Certifications

- CS50x – Harvard University
- Microsoft Azure AI Essentials
- Shekunj AI Course Certificate
- Gateway Load Balancer
- Azure Fundamentals
- GitHub Copilot Fundamentals
- Amazon DocumentDB
- Container Security
- Basics Of Azure Services
- HackerRank Certifications
